COULTER TYPE UNIVERSAL SEED DRILL

Arigo Universal seeder is a combined hanging type seeder that leaves the seed and fertilizer in a desired quantity and at the desired depth and in equal order. Thanks to the end spring ax type feet, it ensures the seed and fertilizer leave into the soil in the same deepness and enables the germination at the maximum level. Seed gears can be turned at very low speeds and even very small seeds can be cultivated properly thanks to the specially designed gearbox, with 3 times quiet running. At the same time, with this gearbox, it is possible to cultivate seeds in desired kilograms per hectare.The row space between legs is 125 cm.Coulter type universal seed drill is manufactured with 16-18-20-22 and 24 legs.

COULTER TYPE UNIVERSAL SEED DRILL / CUS						
Type		CUS 2000-16	CUS 2250-18	CUS 2500-20	CUS 2750-22	CUS 3000-24
