

Cultivator

Cultivator which is used for doing the following tasks in the fields or in the gardens: to cultivate the soil doubly, to extract the wild plants from the soil, to arrange the water distribution well in the soil; to prevent the soil harden at the bottom, and to prepare the soil bed for the seeds. The cultivator keeps the soil with humidity.

CULTIVATOR / CLR

| Type | Number of Tine | Working Width (cm) | Working Depth (cm) | Height (cm) | Weight (kg) | With Single Roller Weight (kg) | With Double Roller Weight (kg) | Required Power (hp) |
|------------|----------------|--------------------|--------------------|-------------|-------------|--------------------------------|--------------------------------|---------------------|
| CLR - 7 A | 7 | 170 | 30 | 124 | 225 | 355 | 475 | 40-50 |
| CLR - 9 A | 9 | 220 | 30 | 124 | 275 | 420 | 565 | 50-60 |
| CLR - 11 A | 11 | 270 | 30 | 124 | 325 | 485 | 655 | 60-70 |
| CLR - 13 A | 13 | 320 | 30 | 124 | 375 | 550 | 745 | 70-80 |
| CLR - 15 A | 15 | 370 | 30 | 124 | 445 | 635 | 855 | 80-90 |
